

# SAI SRAVANI TANGIRALA

United States | [linkedin.com/in/sai-sravani/](https://www.linkedin.com/in/sai-sravani/)

## PROFESSIONAL SUMMARY

Data Analytics professional with 3 years of experience delivering healthcare and enterprise analytics solutions across pharmaceutical and business operations. Skilled in SQL, Python, Power BI, ETL, Data Quality, Predictive Analytics, and Business Intelligence to transform large datasets into actionable insights. Experienced supporting HIPAA-compliant healthcare reporting, enterprise data governance, and cross-functional decision-making within Agile environments.

## EDUCATION

Arizona State University, W. P. Carey School of Business

January 2025 - December 2025

### Master of Science in Business Analytics

*Relevant Courses: Enterprise Data Analytics | Business Process Analytics | Machine Learning in Business | Quantitative Risk Management | AI and Data Analytics Strategy*

Sreenidhi Institute of Science and Technology, India

August 2017 - May 2021

### Bachelor of Technology in Information Technology

## TECHNICAL SKILLS

**Programming & Collaboration:** Python (Pandas, NumPy, Scikit-Learn), Salesforce CRM, Agile/Scrum, JIRA, Confluence.

**Database Engineering & Governance:** SQL (PostgreSQL, MySQL, SQL Server), Data Quality Monitoring, Data Validation, Data Governance, Relational Databases, ETL Pipelines, Data Cleaning & Transformation.

**Analytics & Reporting:** Business Analytics, Statistical Analysis, Regression Analysis, Predictive Analytics, Machine Learning, Data Interpretation, Executive Reporting, Data Storytelling, KPI Development, Trend Analysis, Root Cause Analysis, Strategic Decision Support, Reporting Automation.

**Business Intelligence & Visualization:** Advanced Excel, Power BI, Tableau, Dashboard Development, Data Visualization.

## PROFESSIONAL EXPERIENCE

Capgemini | Hyderabad, India

April 2022 - December 2024

### Senior Analyst | January 2024 - December 2024

- Analyzed healthcare, pharmaceutical, inventory, and operational datasets to identify trends, reporting gaps, and process improvement opportunities supporting business stakeholders.
- Developed and maintained Power BI dashboards and SQL-based automated reports, reducing manual reporting effort by 40%.
- Built SQL queries to extract, transform, validate, and analyze multi-million-record enterprise datasets supporting operational reporting.
- Monitored KPIs, performing trend and root cause analysis to improve reporting accuracy by 25%.
- Supported analytics across multiple pharmaceutical products and pharmacy operations while following HIPAA-compliant data handling and enterprise data governance standards.
- Collaborated with cross-functional business and technical teams to define reporting requirements and deliver analytical solutions.
- Mentored junior analysts on dashboard design, reporting standards, data governance, and data analytics best practices.

### Analyst | April 2022 - December 2023

- Partnered with stakeholders to translate reporting requirements into SQL analyses, dashboards, and actionable business insights.
- Developed SQL queries and ETL data transformation processes to clean, transform, validate, and analyze large operational datasets.
- Collaborated within Agile teams using JIRA and Confluence to deliver reporting enhancements, accessibility, and consistency.

## PROJECTS

**Healthcare Inventory Management** | HonorHealth Capstone Project | Arizona, USA

September 2025 – December 2025

*Technologies Used: Power BI, Advanced Excel, Python*

- Analyzed 83,000+ healthcare inventory records across eight regional warehouses, developing Power BI dashboards that reduced manual monitoring by 60%.
- Performed KPI tracking, reporting validation, and trend analysis to support inventory optimization and operational decision-making.

**Student Performance Prediction Model** | Machine Learning in Business | Arizona, USA

March 2026 – May 2026

*Technologies Used: Python (Pandas, NumPy, Scikit-Learn), Neural Networks, and Explainable AI Tools*

- Developed regression and machine learning models using Python to predict student performance through feature engineering, model evaluation, and predictive analytics.
- Applied explainable AI techniques to interpret model outputs and communicate actionable insights supporting stakeholder decision-making.
